## OBJECTIVE

---

AI-Enhanced Engineer / AI-Augmented Developer with over 1 year of intensive backend development experience. Successfully increased system efficiency by 25%, reduced error rates by 30%, and resolved over 50 technical issues within 6 months. Proficient in Java and Python, with extensive experience using Quarkus and developing RESTful APIs to manage systems containing over 1,000 data entries accurately and reliably.

## EXPERIENCE

---

### Junior Backend Developer Intern | Fajri Inc

JAKARTA CITY, ID  
Dec 2023 - Present

- Developed and maintained backend services using Java Quarkus for CRUD operations, successfully increasing data processing efficiency by 25%.
- Implemented RESTful APIs to optimize data flow between user interfaces and databases, reducing response times by 15% and achieving 95% uptime for system reliability.
- Contributed to code refactoring initiatives that resulted in a 30% reduction in error rates and a 40% decrease in code duplication.
- Collaborated with cross-functional teams (frontend, QA) to identify and resolve over 50 technical issues within 1 month.

### Software Engineer | GenAILabs | Remote

JAKARTA CITY, ID  
Dec 2025 - March 2026

- Developed GlobalVin (globalvin.co), a global vehicle data platform with VIN decoding, vehicle history reports, and REST API-based automotive data services
- Built 17+ AI-powered SEO workflow templates for SerpAI using Claude (Anthropic) and Gemini with runtime-switchable model support
- Integrated Google Search Console & Google Ads APIs; built pluggable SERP scraper supporting 8+ providers to eliminate vendor lock-in
- Designed cron-based background job system for scheduled scraping, retries, and notifications; implemented Stripe billing with tiered pricing
- Containerized platform with Docker (multi-stage Alpine build) for self-hosted deployment

## SKILLS

---

Languages :Java, Python, JavaScript/TypeScript

Databases :PostgreSQL, MySQL, MongoDB

Frameworks :Spring Boot, Quarkus, Node.js, Express.js

Architecture. :Microservices, RESTful API

DevOps/Cloud: Docker, Kubernetes, Git

Tools :IntelliJ IDEA, VS Code, Cursor AI, Postman, DBeaver, Jira

## EDUCATION

---

### Private Programming Mentorship | Super Pro

JAKARTA, ID  
Jan 2023 - Present

- Received personalized mentorship in advanced coding concepts and best practices.
- Engaged in hands-on projects to deepen knowledge of backend development and design patterns.

## ADDITIONAL INFORMATION

---

- Availability: Immediately available for full-time opportunities
- Interests: Continuous learning, exploring new frameworks, contributing to open-source projects
